Master: Khrystyna Grynko
Student: Somnath Sudarshan

Dear Somnath, you can leave your comments (using the google doc "comment" functionality) in this feedback document to ask questions, share your thoughts etc. Don't forget to tag me to make sure I receive the notifications.

Thanks!

Overall feedback

I wanted to thank you for your hard work and dedication over the past 6 months. I have been very impressed with your performance, and I am confident that you have learned a great deal during your time here.

I particularly appreciate your willingness to go the extra mile and your positive attitude. You have been a pleasure to work with, and I am confident that you will be successful in your future endeavors.

And once again you confirmed your expertise by delivering a project that exceeds expectations!

Dashboard - Improvement feedback

Pay attention to the number of colors you use, sometimes the large variety of colors might confuse the viewers, they don't know what to pay attention to. Be mindful of the number of the pieces of information and graphics per page. Try to answer one big question per page.

Check these [Dashboard design principles](#)

Project Summary (pdf) - Improvement feedback

Might be worth providing a one-pager with some bullet points and key findings for the "busy boss" about what happened and why. It's a possibility to train your skills of simplifying the information for those who you'll report to and who don't have a lot of time.

Project Insights (video) - Improvement feedback

Great presentation! Just be mindful about the audience you're presenting too. With the questions asked we might make an assumption that the audience is not technical therefore we should avoid talking to them with terms like SQL etc.
We can discuss it during our 1to1 if you want!
